

Asia-Pacific MOOC Conference 2023

With the global development of the online learning environment, it is becoming possible for learners to freely select content and learn without being restricted by time and space. Many online teaching materials are already available globally, but in order to appropriately meet the needs of various learners, it is necessary to clearly indicate the learning purpose, content, and completion conditions of learning content, as well as quality assurance.

In addition, against the background of rapid progress in industrial structure and technology due to digitalization, Micro-credentials, which are used to study specific fields and prove their learning outcomes, are attracting attention, and efforts are rapidly progressing around the world.

This Asia-Pacific MOOC Conference 2023 will be held under the themes of "Toward the Asia-Pacific MOOCs collaboration" and "International recognition and collaboration on Micro-credentials." We will deepen the discussion about MOOC international exchange and micro-credentials with those who are promoting MOOC in various countries.
